

UPCYCLING WORKSHOP

Merijaan

WE WARMLY INVITE YOU TO VISIT THE PLASTIC UPCYCLING WORKSHOP

You will explore the material nature of plastic, find out how to tell the difference between various types of plastic and why plastic deserves a second life. In the workshop you will examine your household waste, separate it and transform it into new and great objects. You will shred it and then turn it into rulers, face shields or other products used today. At the end there will be enough time to decorate your self-recycled items.

Finally, we will discuss how we can all produce less plastic waste in our everyday lives in the future! And now that you're curious to know more: You can learn about different kinds of plastic here with Gianna and Isabella from Merijaan:

PROJECT DEVELOPER

Gianna Mewes and Isabella Artadi are the founders of the Merijaan start up. Merijaan is changing the world piece by piece, wave by wave, day by day. The team works for a world without new plastic production. Together they recycle plastic waste into new, beautiful and durable products.
